
Model “buy local” trading patterns with **supply limits** on local purchasing, resulting in **feasible economic impact targets** for even **large projects**.

Your own portal

We set up a portal for you that includes access for up to three analysts from your organization. You can analyze impacts for an unlimited number of economic development incentive cases, obtain economic contribution reports for industries or facilities in your region, create unlimited number of multi-criteria planning scenarios, download multiplier datasets, and since you have access to our full national dataset, you can compare your region with other regions in the U.S. In addition to our economic accounting apps, we can customize our spreadsheet and graphic tools based on your specs to give you a personalized set of online data viewing tools for your organization.

Workspace features

- National data coverage included
- Regional economic impact app
- Industry contribution app
- Multiplier maps and datasets
- Multi-criteria decision analysis app
- Workbooks packed with income, industry, workforce, imports, energy, emissions, and top connections data
- Download raw model output files in CSV format
- Edit local industry data
- Custom data viewing and graphing capabilities

Our apps are at

<https://decisioncommerce.com>.

No registration required. Just go.

State-specific **energy parameters** account for regional differences in **climate and fuel mix**.

Economic accounting

Economic accountants collect, analyze, and present data to improve economic performance. We designed our apps specifically for this purpose – supporting processes, improving performance.
