

We bring regional **economic accounting** into the **performance management process**, supporting development of **healthy and strong** local economies. **Accountability**, made simple and affordable.

Economic Accounting

Developing a healthy, resilient economy requires data on how investments and programs affect the economy, from diversity and growth in industry and occupations to ripple effects on energy and emissions. Our apps and services account for these effects, helping you plan, analyze, improve, and report economic performance.

Our Services

Planning, Analyzing, Reporting	Online Apps	Annual Advisory Service	Individual Projects
